EDUCATION

SRM University

B.Tech - Computer Science and Engineering - CGPA: 9.55

2024–2028

Amaravati, Andhra Pradesh

VJ Junior College

Intermediate (MPC) - Percentage: 98.2%

2022–2024

Mangalagiri, Andhra Pradesh

Aravinda Model School

Secondary School Certificate (SSC) - Percentage: 92.3%

2021–2022

Mangalagiri, Andhra Pradesh

EXPERIENCE

CCC Digital Private Limited

Product Engineering with AI Intern

May 2026 – Present

Remote

- Developed an AI-Powered Question Bank Generator using React, Node.js, Express.js, PostgreSQL, and Prisma to automate coding question generation and management.
- Implemented secure authentication, role-based access control, RESTful APIs, and AI-powered features for personalized learning and career roadmap recommendations.
- Integrated web scraping from LeetCode, CodeChef, Codeforces, and HackerRank to build a centralized repository of coding questions with advanced search and filtering.
- Collaborated with the development team using Git and GitHub to design, develop, test, and deploy scalable application features.

InAmigos

Web Developer Intern

July 2026

Remote

- Developed responsive and user-friendly web applications using React, JavaScript, HTML, CSS, and Node.js.
- Integrated frontend interfaces with backend APIs to deliver dynamic features and improve application performance.
- Utilized Git and GitHub for version control, code collaboration, and maintaining an efficient development workflow.

PROJECTS

Project Submission and Evaluation Portal 📄 | React, JavaScript, Node.js, MongoDB

- Developed a centralized project management platform enabling users to create, organize, and track project activities efficiently.
- Implemented secure user authentication, project collaboration features, and role-based access control to enhance team productivity.
- Designed responsive frontend interfaces and integrated backend APIs for real-time project updates, task management, and seamless user experience.

2026

Employee Payroll Management System 📄 | Node.js, Express, MySQL

- Designed a 3NF normalized relational schema ensuring data consistency.
- Wrote optimized SQL queries (JOINS, aggregations) for payroll processing.
- Improved performance using indexing and efficient query design. Maintained data integrity using constraints (PRIMARY KEY, FOREIGN KEY, UNIQUE, NOT NULL)

2025

Attendance Management System Using Bit Manipulation 📄 | React, Node.js, Express, MySQL, Python

- Developed an efficient attendance management system using bit manipulation techniques to store and track attendance data.
- Optimized space complexity by representing attendance records using binary encoding, reducing memory usage significantly.
- Implemented fast operations for marking attendance, checking presence, and generating reports using bitwise operators.

2025

SKILLS

Languages: Python, C++, JavaScript, Java, SQL, OOPS

Technologies/Frameworks: HTML5, CSS3, React, MongoDB, Express, JavaScript, Node.js, Linear and logistic regression, Hypothesis testing, KPI analysis, Basics of Business Analytics.

Developer Tools: Brity RPA Designer, Git, Github, VS Code, PyCharm, Canva

Soft Skills: Communication skills, Problem solving, Adaptability, Time management, Quick learning

ACHIEVEMENTS

- Selected as a Finalist in Code4Her Hackathon, organized by GDG SRM AP, where the project advanced to the final round among multiple competing teams.
- Participated in the Amaravati Quantum Valley Internal Hackathon 2025 (SRM University AP, Amaravati), collaborating on innovative solutions and solving real-world problem statements in a competitive environment.
