SUMMARY

Computer Science undergraduate with experience building AI-powered and full-stack technology solutions using React, Node.js, FastAPI, PostgreSQL, and cloud technologies. Skilled in translating business and application requirements into scalable solutions, developing REST APIs, implementing secure systems, and collaborating with teams to solve technology-driven problems.

EXPERIENCE

CCC Digital Private Limited May 2026 – July 2026
Product Engineering with AI Intern Remote

- Developed a scalable AI-powered Question Bank Generation platform using React, Node.js, Express.js, PostgreSQL, and Prisma, enabling automated question creation and management.
- Translated application requirements into secure technology solutions by designing RESTful APIs, authentication, role-based access control (RBAC), and optimized backend services.
- Integrated web scraping from LeetCode, CodeChef, Codeforces, and HackerRank to build a centralized repository of coding questions with advanced search and filtering.
- Collaborated with the development team using Git and GitHub to design, develop, test, and deploy scalable application features.

InAmigos July 2026
Web Developer Intern Remote

- Developed responsive web applications using React, JavaScript, HTML, CSS, and Node.js, translating functional requirements into user-focused solutions.
- Integrated frontend interfaces with backend APIs to deliver dynamic features and improve application performance.
- Utilized Git and GitHub for version control, code collaboration, and maintaining an efficient development workflow.

PROJECTS

Project Submission and Evaluation Portal | React, JavaScript, Node.js, MongoDB 2026

- Developed a centralized project management platform to streamline project creation, collaboration, evaluation, and tracking.
- Implemented secure user authentication, project collaboration features, and role-based access control (RBAC) to enhance team productivity.
- Designed responsive frontend interfaces and integrated backend APIs for real-time project updates, task management.

Personal-Finance-Agent | Python, FastAPI, Streamlit, OpenAI, Pydantic 2026

- Developed an AI-powered Personal Finance Agent that analyzes financial data and provides proactive insights through a modular FastAPI and Streamlit architecture.
- Implemented a modular service architecture following SOLID principles, including dependency inversion and single-responsibility design. Integrated memory architecture and financial data workflows using CSV/Plaid.

Lumina:AI Text-to-Image Generator | OpenAI GPT-Image-1, React.js, TypeScript, Express.js, PostgreSQL, Clerk Authentication 2026

- Engineered a full-stack AI image generation platform that converts natural-language requirements into visual outputs using OpenAI GPT-Image-1.
- Architected a secure and scalable backend with Clerk Authentication, Express.js, and PostgreSQL (NeonDB), featuring image history, collections, favorites, variations, and complete CRUD operations.
- Crafted a responsive, animation-rich UI with React, TypeScript, Tailwind CSS, and Framer Motion.

EDUCATION

SRM University AP 2024–2028
B.Tech - Computer Science and Engineering - CGPA: 9.55 Amaravati, Andhra Pradesh

SKILLS

Languages: Java, Python, JavaScript, C++, SQL
Software Development: React.js, Node.js, Express.js, FastAPI, REST APIs, TypeScript
Cloud & DevOps: Azure, AWS, Docker, GitHub Actions, CI/CD
Databases: PostgreSQL, MongoDB, Prisma ORM
Core CS: Data Structures & Algorithms, Object-Oriented Programming, DBMS, Operating Systems, Computer Networks, System Design
Tools: Git, GitHub, Postman, VS Code

ACHIEVEMENTS and CERTIFICATIONS

- Finalist, Code4Her Hackathon, GDG SRM AP.
- Participant, Amaravati Quantum Valley Internal Hackathon 2025, SRM University–AP.
- Microsoft Learn Badges: Generative AI and Agents in Azure; Plan and prepare to develop AI solutions on Azure.
